FILE TRANSFER WEB APPLICATION

BY WEBHUNTERS

PROBLEM STATEMENT

- A user-friendly, secure file transfer platform poses challenges for efficient collaboration and data sharing

TEAM

- BHATLAWANDE VARUN SHRIDHARRAO
- AMAN SINGH CHAUHAN
- ANUJ DEEP
- PRINCE KUMAR BHASKAR

PROPOSED SOLUTION

- Our solution involves the development of a file transfer web application by the WEBHUNTERS team.

- Through secure user authentication by login through username & password .

- intuitive drag-and-drop or browsing file upload options

WORK SO FAR

- As of now, we've focused on frontend development .
- We've made progress, but we're still at a basic level.
- We've designed an interface for web application using HTML and CSS
- We've implemented login authentication using Django

PENDING WORK:

- implementing functionality for
- file storing on server and downloading

CODE

- While our currently have made frontend development and login authentication server code snippets uploaded on github on below link
- https://github.com/varunbzv/WEBHUNTERS

TEAM CONTRIBUTION

- The WebHunters team comprises
- Bhatlawande Varun Shridharrao
- Aman Singh Chauhan,
- Anuj Deep
- Prince Kumar Bhaskar.
- Each member has contributed to the project's design and development efforts using their unique skills

CHALLENGES

- We have encountered typical challenges of development including
- time constraints
- learning new things
- technical complexities
